

CSC 231 Grading Rubric

1. Submitted code has syntax errors - **You receive a grade of 0 for the assignment.**
2. **Documentation and coding conventions (DOCC) grade:**
 1. Your code follows coding conventions described [here](#), and it is well documented using *docstring* comments. You receive a DOCC grade of 1.
 2. Your code violates one or more coding conventions, or it is poorly documented. You receive a DOCC grade of no more than 0.8, depending on the extent of the violations.
3. **Functionality grade:** have you done what you were asked to do? does your code function as expected? This is graded as described in each assignment.
4. **Assignment grade = DOCC grade * functionality grade.** Thus, if your code functions as expected and is properly documented and follows coding conventions, you get a grade of $1 * 100 = 100$. On the other hand, if your code is functional but is poorly documented, you get a grade no higher than $0.8 * 100 = 80$.
